Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10,12,59-67, 88, drawn to distributing information bundles, classified in class 705, subclass 34.
- II. Claim 89, drawn to receiving information bundles, classified in class 705, subclass 26.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as an intercept and tap process under the Patriot Act. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
